

THE UNIVERSITY OF CHICAGO
DEPARTMENT OF EMERGENCY SITUATIONS
PURSUANT TO 365 ILCS-P3378

NOTICE OF IMMINENT DORM SHUTDOWN

Max Palevsky Residential Commons is scheduled for an early demolition date of

APRIL 1

Due to circumstances surrounding campus expansion, detailed below, the building demolition has been moved forward.

Recently, as University workers dug tunnels to expand seating for Bartlett Dining Hall, they uncovered complications below the Nuclear Energy sculpture built on old Stagg Field. Sources suggest that the workers dug too greedily and too deep. They awakened something ancient in those fires, a nameless being created before the dawn. Nuclear testing seems to have resulted in hideous mutations of local flora and fauna that have continued to thrive beneath the Max Palevsky Residential Commons. These creatures have been slowly expanding up into the foundation of the residences themselves. The University has hired mercenaries to settle the problem and their work must be complete before the units can be rebuilt and repopulated.

Please evacuate in an orderly manner and salt your path behind you liberally, lest you encounter giant mutated rats, monster seaweed, or hideous purple and orange architecture.

New housing assignments will be announced at

6:30 P.M. APRIL 1 IN
HUTCHINSON COURTYARD

There will be free cake and entertainment provided by Aramark.
